OBJECTIVE

Software Engineer with hands-on experience in Python automation, data processing, data validation, and software development. Proficient in Java, Python, C, SQL, Git, Object-Oriented Programming (OOP), and Data Structures and Algorithms. Experienced in developing automation tools and data-driven applications with practical knowledge of debugging, testing, problem-solving, and application maintenance. Hands-on project experience in SQL, DBMS, REST APIs, and web development. Seeking an Engineer R&D role to contribute to software design, development, testing, debugging, and maintenance of reliable software applications.

EXPERIENCE

Remote — Intern

April 2023 – June 2023

IIITH

RGUKT-Basar

- Contributed to the creation of a Human-Annotated Headline Classification Dataset for the Telugu language.

Software Engineer – Data Automation & Analytics

Sept 2025 – Present

DOT Outsourcing

- Developed Python-based software applications to automate large-scale data processing, validation, reconciliation, and reporting workflows for Department of Telecommunications (DoT) operations
- Designed and implemented scalable data processing modules for handling high-volume structured datasets related to telecom investigations, citizen complaint systems, and fraud analysis.
- Automated analysis and reporting workflows supporting initiatives such as NCRP, Chakshu, and DoT portal data verification processes, significantly reducing manual effort and turnaround time.
- Built robust data cleaning, normalization, deduplication, and validation pipelines to improve data quality and consistency across multiple heterogeneous datasets.
- Performed data analysis to identify mismatches, anomalies, trends, and actionable insights, supporting operational and regulatory decision-making.
- Translated raw government datasets into actionable insights by building analytical reports and pivot-based summaries.
- Collaborated with stakeholders to gather requirements, troubleshoot issues, and deliver software solutions aligned with business and operational objectives.
- Enhanced existing automation tools and reporting workflows to improve processing speed, reliability, and data accuracy.

EDUCATION

Rajiv Gandhi University of Knowledge Technologies, Basar

July 2020 – May 2024

Bachelor of Technology in Computer Science

CGPA-7.69/10

Rajiv Gandhi University of Knowledge Technologies, Basar

July 2018 – May 2020

Pre University Course

CGPA-8.19/10

Telangana State Model School, Imampet

April 2018

Secondary School Certificate

CGPA-9.7/10

PROJECTS

MovieGlide | *React.js, Express.js, Node.js, My sql, Css*

Aug 2024 – Nov 2024

- Developed a full-stack movie ticket booking system with features like seat selection, showtime scheduling, and secure user authentication.
- Developed a React.js frontend and Node.js/Express backend, integrating MySQL for user, booking, and transaction data management.
- Designed efficient database schemas with foreign key relationships for managing user and booking data.

- * Built and integrated RESTful APIs for ticket booking, authentication, seat allocation, and booking management.

CMS | *React.js, Bootstrap, MongoDB, Node.js, Express.js*

Oct 2023 – May 2024

- * Developed a CMS for CSE students, featuring a user-friendly interface for lodging complaints related to academics, faculty, and personal issues, along with an admin module for the CSE HOD to manage complaints
- * Built the frontend using React.js, ensuring a user-friendly interface and backend services with Node.js and Express.js, providing robust APIs for complaint submission and tracking.
- * Designed and integrated RESTful APIs for complaint submission, status tracking, and administrative management.

BulkMatcher – Large-Scale Data Matching Tool | *Python, Pandas, Tkinter/GUI, XLSX* Oct 2025 – Present

- * Architected a chunk-based data processing engine to match mobile numbers across 4-5 datasets (1-10+ lakh rows, 5-10GB each) without memory overflow.
- * Built a modular Tkinter-based GUI for dataset uploads, configurable matching operations, and automated workflow execution.
- * Implemented data matching, validation, and reconciliation workflows for large-scale datasets.
- * Generated automated XLSX reports with matched records, summary metrics, and reconciliation outputs for large-scale data analysis.

TECHNICAL SKILLS

Programming Languages: Java, Python, C, JavaScript, SQL

Software Development: Object-Oriented Programming (OOP), Data Structures, Algorithms, Software Design, Debugging

Backend Technologies: Node.js, Express.js, REST APIs, JSON, HTTP

Frontend Technologies: React.js, HTML5, CSS3, Bootstrap

Databases: Databases: MySQL, SQL Queries, Database Design

Data Processing Automation: Pandas, Data Validation, Data Transformation, Data Analysis, Reporting Automation

Developer Tools : Git, GitHub, VS Code

Operating Systems: Windows, Linux (Basic)

CERTIFICATIONS

- Programming in Java — NPTEL, 2024
- Blockchain and Its Applications — NPTEL, 2024
- Problem Solving — HackerRank, 2022
